DAP 2023 SYMPOSIUM

OUR THEME:
**IN THE HEAT OF THE MOMENT:
Breaking new grounds**

We are in a world of drastic changes. We all experienced how fragile the European energy market is, dependent on countries and factors such as pandemics and wars that probably no one expected could happen in the modern world. With our theme we want to focus on the expansions and perspectives of geothermal industries. We would like our attendees and speakers to reflect on the Master Plan Geothermal energy, as well as what we have reached in the past years to reach the goal of net-carbon zero in the regards of the geothermal industry. In particular, we want to highlight the developments in research and investments in the geothermal fields towards these goals and what it is still necessary to be done towards a more green future for the next generations.

Updates on DAP Well

Get to know the last updates on the geothermal well that will provide heat to the city of Delft and will be used for research purposes.

Latest Geothermal RESEARCH

During the symposium several experts will present some new grounds where geothermal industry is expanding.

Get in contact with the INDUSTRY

Get in touch with other professionals in the geothermal and energy industries during the symposium.

Start the conversation

Possibilities to interact and debate with colleagues and experts in one event.

THANK YOU

FOR CONSIDERING US!

Feel free to contact us for any other business and matters. We are looking forward to see you on Summer 2023 at the 5th DAP Symposium in Delft.

The 5th DAP Symposium Committee.
